## How to read this section

### Prices

Included for each product in this section are the average wholesale price (AWP) and the direct price (DP) or suggested retail price (SRP), where available. To help you distinguish between the direct price and the suggested retail price, the SRP is printed in bold italics.

Prices are generally expressed in terms of a dozen units. Unit costs are identified as "ea," "per pkg," "per unit," "per case," or "per carton." The "per gross" cost indicates 144 units.

All prices are current as of the time this publication went to press. The actual price paid by retailers, however, may fall above or below those reported prices, and all published prices are subject to change without notice.

Pricing information is based on data obtained from manufacturers, distributors, and other suppliers. The information contained in *Red Book* may be supplemented by pricing information published in catalogues or other printed materials disseminated by manufacturers or distributors.

The publisher of *Red Book* has exercised the greatest care and caution in compiling prices, sizes, and other information contained herein. *Red Book*, however, cannot be responsible for clerical or typographical errors or inaccurately supplied information.

### Names

Where a product is marketed by its trademarked name, it appears alphabetically under that name in the listings on the following pages. For example, the product "Valium," made by Roche Laboratories, is found under "V." In parentheses next to the brand name is the name of the manufacturer. On the next line is the generic or chemical name for the product.

Where a product is known by the manufacturer's name, it appears under the manufacturer's name. For example, the syringes and needles made by Becton, Dickinson & Co. appear under "B."

Drugs marketed under generic names are listed under the generic names. Aspirin, for example, can be found under "A" and penicillin under "P."

If you know the manufacturer of a drug but are not certain of the trade name, check the manufacturers' catalogues in Section 10.

This year's annual again contains detailed new information as a result of the cross-referencing of brand and generic drugs. Specifically, each brand-name product has its corresponding chemical or generic name printed below the trademarked name.

Under generic headings, you can now find not only generic companies' products but cross-references that include the brand-name manufacturers with their corresponding trademarked product names. These listings are designed to give you a more comprehensive and complete indexing and cross-referencing capability for brand and generic drugs.

### Symbols

**Rx**—Prescription only

©, ®, ®, ®, ® — These symbols indicate scheduled drugs that came under the jurisdiction of the Controlled Substances Act of 1970. The descriptive symbols in this *Red Book* are to be looked upon as a guide only. The final and absolute check of a product's status—CII-CV or Rx—should be the manufacturer's label itself.

### Manufacturers

Listed with the product is the abbreviated name of the manufacturer. For the manufacturer's complete name, address, zip code, and telephone number, refer to the "List of Manufacturers" in Section 8.

### Abbreviations

The following abbreviations are used with the product listings throughout this edition and are included according to information from manufacturers.

B.P.	blister pack	P.R.	prolonged-release
C.A.	continuous-action	P.T.	prolong tabs
C.C.	chocolate-coated	R.A.	released-action
C.R.	continuous-release	R.N.	reverse numbered
C.T.	compressed tablets	S.A.	sustained-action or slow-acting
D.A.	delayed-action	S.F.	sugar-free
D.F.	dye-free	S.C.	sugar-coated
D.S.	double-strength	S.L.	sublingual
E.C.	enteric-coated	S.G.	soft gelatin
F.C.	film-coated	S.R.	sustained-release or slow-release
G.R.	gradual-release	S.S.	single-strength
H.G.	hard gelatin	St.F.	starch-free
H.P.	high-potency	S.U.P.	single-unit package
H.T.	hypodermic tab	T.C.	therapeutic concentrate
I.M.	intramuscular	T.D.	timed-disintegrating
I.V.	intravenous	T.R.	timed-release
L.A.	long-acting	T.L.	triple-layer
M.L.	multilayer	T.T.	tablets triturate
O.S.	oral suspension		
P.A.	prolonged-action
